

Task 2 – Data Collection Report By Noor Ul Huda

1. Data Source

Company: Google

Dataset: Google Job Skills

Source/Platform: Kaggle

Original Source: Google Careers

Dataset License: CC BY-NC-SA 4.0

The Google Job Skills dataset was collected from the approved Kaggle source identified in Task 1. The dataset contains information related to Google job postings, including job title, category, location, responsibilities, minimum qualifications, and preferred qualifications.

2. Data Collection Method

The existing Google Job Skills dataset was downloaded from Kaggle. No independent scraping of Google Careers was performed. The original dataset has been retained as the raw dataset without modification.

3. Legal and Ethical Checks

- The dataset is available under the **CC BY-NC-SA 4.0** license.
- The dataset will be used for academic/non-commercial purposes.
- Appropriate attribution to the dataset creator will be provided.
- The dataset will not be presented as an official or Google-endorsed dataset.
- No independent scraping of Google Careers was performed.
- No personal or sensitive information has been intentionally collected.
- The source and applicable license conditions have been documented.

4. Dataset Structure

The collected dataset contains:

Number of records: 1,250

Number of fields/columns: 7

Fields in the Dataset

1. Company
2. Title
3. Category
4. Location
5. Responsibilities

6. Minimum Qualifications

7. Preferred Qualifications

5. Data Quality Checks

The dataset was checked for missing values and duplicate records.

Missing Values

- **Responsibilities:** 15 missing values
- **Minimum Qualifications:** 14 missing values
- **Preferred Qualifications:** 14 missing values
- **Company:** No missing values
- **Title:** No missing values
- **Category:** No missing values
- **Location:** No missing values

Duplicate Records

The dataset contains **123 duplicate rows**.

These duplicates have been identified during the data-quality check. The original raw dataset has been preserved without modification; therefore, duplicates have not been removed from the raw file.

6. Personal and Sensitive Information Check

The dataset fields were reviewed for personal or sensitive information. No obvious fields containing personal information such as individual names, email addresses, phone numbers, or other direct personal identifiers were identified in the dataset structure.

7. Limitations

- The dataset is an existing dataset obtained from Kaggle rather than data collected directly through the current Google Careers website.
- Some records contain missing information in the Responsibilities, Minimum Qualifications, and Preferred Qualifications fields.
- Duplicate records are present in the raw dataset.
- The dataset reflects the information available in the source dataset and may not represent all current Google job postings.

8. Task 2 Outcome

The approved Google Job Skills dataset has been successfully collected and verified. The raw dataset contains **1,250 records and 7 fields**. Data-quality checks identified **43 missing values across three fields and 123 duplicate rows**. The raw dataset has been preserved for subsequent processing and analysis.
